REST Specification

All endpoints except /register and /login may return:

401 Unauthorized – User is not authenticated

403 Forbidden – User is authenticated but not authorized to access the resource

500 Internal Server Error – Unexpected server error

Any endpoint with a path parameter may return:

404 Not Found – The requested resource (e.g. User, Household, Item, Recipe) does not exist

Mapping	Method	Parameter	Parameter Type	Status Code	Response	Description
		Access Management				
/register	POST	username<string>, password<string>	Body	201	User	register new user
/register	POST	username<string>, email<string>, password<string>	Body	409	Error	username already exists
/register	POST	username<string>, email<string>, password<string>	Body	409	Error	email already exists
/login	POST	username<string>, password<string>	Body	200	AuthToken (in header)	login successful
/login	POST	username<string>, password<string>	Body	401	Error	invalid credentials
/logout	POST	token<string>	Body	401	Error	invalid credentials
/users/{userId}	GET	userId<string>	Path	200	User	get user profile
/users/{userId}	PATCH	User	Body	204	-	update user

/users/{userId}	DELETE	userId<string>	Path	204	-	delete user
Households						
/households	GET	-	-	200	List<Household>	list households
/households	POST	name<string>	Body	201	Household	create household
/households	POST	name<string>	Body	400	Error	Invalid Request Body
/households/{householdId}	GET	householdId<string>	Path	200	Household	get household
/households/{householdId}	PUT	Household	Body	204	-	update household
/households/{householdId}	PUT	Household	Body	400	Error	Invalid Request Body
/households/{householdId}	DELETE	householdId<string>	Path	204	-	delete household
Household Members						
/households/{householdId}/members	GET	householdId<string>	Path	200	List<Member>	list members
/households/{householdId}/members	POST	userId<string>	Body	201	Member	add member
/households/{householdId}/members	POST	userId<string>	Body	400	Error	Invalid Request Body
Shopping Lists						
/shopping-lists	GET	-	-	200	List<ShoppingList>	list shopping lists
/shopping-lists	POST	name<string>	Body	201	ShoppingList	create shopping list
/shopping-lists	POST	name<string>	Body	400	Error	Invalid Request Body
/shopping-lists/{shoppingListId}	GET	shoppingListId	Path	200	ShoppingList	get shopping list

/shopping-lists/{shoppingListId}	PUT	ShoppingList	Body	204	-	update shopping list
/shopping-lists/{shoppingListId}	PUT	ShoppingList	Body	400	Error	Invalid Request Body
/shopping-lists/{shoppingListId}	DELETE	shoppingListId	Path	204	-	delete shopping list
Items						
/items/{itemId}	GET	itemId<string>	Path	200	Item	get item
/items/{itemId}	PUT	Item	Body	204	-	update item
/items/{itemId}	PUT	Item	Body	400	Error	Invalid Request Body
/items/{itemId}	PATCH	isBought<boolean>	Body	200	Item	update bought status
/items/{itemId}	PATCH	isBought<boolean>	Body	400	Error	Invalid Request Body
/items/{itemId}	DELETE	itemId<string>	Path	204	-	remove item
Pantry						
/households/{householdId}/pantry	GET	householdId<string>	Path	200	Pantry	load pantry
/households/{householdId}/pantry	POST	name<string>, quantity<int>	Body	201	PantryItem	add pantry item
/households/{householdId}/pantry	POST	name<string>, quantity<int>	Body	400	Error	Invalid Request Body
Meal Planning						
/households/{householdId}/meal-plans	GET	householdId<string>	Path	200	List<MealPlan>	list meal plans
/households/{householdId}/meal-plans	POST	name<string>	Body	201	MealPlan	create meal plan
/households/{householdId}/meal-plans	POST	name<string>	Body	400	Error	Invalid Request Body

/meal-plans/{mealPlanId}	GET	mealPlanId<string>	Path	200	MealPlan	get meal plan
/meal-plans/{mealPlanId}	PUT	MealPlan	Body	204	-	update meal plan
/meal-plans/{mealPlanId}	PUT	MealPlan	Body	400	Error	Invalid Request Body
/meal-plans/{mealPlanId}	DELETE	mealPlanId<string>	Path	204	-	delete meal plan
Meals						
/meal-plans/{mealPlanId}/meals	GET	mealPlanId<string>	Path	200	List<Meal>	list meals
/meal-plans/{mealPlanId}/meals	POST	recipeId<string>	Body	201	Meal	add meal
/meal-plans/{mealPlanId}/meals	POST	recipeId<string>	Body	400	Error	Invalid Request Body
/meals/{mealId}	GET	mealId<string>	Path	200	Meal	get meal
/meals/{mealId}	PUT	Meal	Body	204	-	update meal
/meals/{mealId}	PUT	Meal	Body	400	Error	Invalid Request Body
/meals/{mealId}	DELETE	mealId<string>	Path	204	-	remove meal
Recipes						
/recipes	GET	-	-	200	List<Recipe>	list recipes
/recipes	POST	Recipe	Body	201	Recipe	create recipe
/recipes	POST	Recipe	Body	400	Error	Invalid Request Body
/recipes/{recipeId}	GET	recipeId<string>	Path	200	Recipe	get recipe
/recipes/{recipeId}	PUT	Recipe	Body	204	-	update recipe

/recipes/{recipeId}	PUT	Recipe	Body	400	Error	Invalid Request Body
/recipes/{recipeId}	DELETE	recipeId<string>	Path	204	-	delete recipe
Favorites						
/recipes/favorites	GET	-	-	200	List<Recipe>	list favorite recipes
